WASHINGTON, D. C. 20360

IN REPLY REFER TO  
ONR:405:MCY:KEZ  
10 August 1965

Dr. Harold Shapiro, President  
Systems Research Group, Inc.  
1501 Franklin Avenue  
Mineola, New York 11501

Dear Dr. Shapiro:

The Office of Naval Research is pleased that an extensive effort on your part has resulted in the successful completion of the MILITRAN language and compiler system. It is most gratifying that a number of trials have shown that MILITRAN, although developed primarily for the efficient and rapid programming of military system simulations, is directly applicable to a wide range of general system simulations as well.

The Office of Naval Research welcomes the opportunity to spread information about MILITRAN to other organizations, both within and outside the Department of Defense. Accordingly we endorse your planned course in MILITRAN and feel that it will fulfill a most desirable and worthwhile purpose. It is our understanding that this course will be offered on a substantially self-sustaining basis by the Systems Research Group.

Sincerely yours,

  
MARSHALL C. YOVITS  
Director, Naval Analysis Group
